

Claims

What is claimed is:

1. Dryer duct and register brush comprising:

an elongate handle;

a shaft consisting of a pair of twisted metal wires;

a plurality of bristles intertwined with said twisted wire shaft in a perpendicular orientation;

a protective soft plastic cap fixedly attached to and covering the tip of said wire shaft;

said shaft being fixedly and longitudinally attached to said handle;

said bristles being radially arranged about said shaft so that said bristles form a brush member approximately four inches in diameter and four inches long;

said bristles being made of nylon or the like and each having a diameter of approximately thirty two thousandths of an inch;

said bristles being equally spaced so that there are approximately one hundred and twenty bristles per linear inch;

said shaft being approximately forty three inches long; and

said shaft having a diameter of approximately two hundred and twenty five thousandths of an inch.

2. Dryer duct and register brush as claimed in claim 1 wherein said shaft can be

bent to accommodate twists and turns in standard four inch dryer ducts.

3. Dryer duct and register brush as claimed in claim 1 wherein said shaft can be bent in half for compact storage and shipping.
4. Dryer duct and register brush as claimed in claim 1 wherein said handle is made of non slip wood or plastic.
5. Dryer duct and register brush as claimed in claim 1 wherein said handle includes an aperture so that the present invention can be hung on a peg or the like.
